# UNIT 7 FINAL ACCOUNTS I

---

## Structure

- 7.0 Objectives
- 7.1 Introduction
- 7.2 Final Accounts and Trial Balance
- 7.3 Trading and Profit and Loss Account
  - 7.3.1 Trading Account
  - 7.3.2 Profit and Loss Account
  - 7.3.3 Closing Entries
- 7.4 Balance Sheet
- 7.5 Vertical Presentation of Final Accounts
- 7.6 Manufacturing Account
- 7.7 Let Us Sum Up
- 7.8 Key Words
- 7.9 Some Useful Books
- 7.10 Answers to Check Your Progress
- 7.61 Terminal Questions/Exercises

---

## 7.0 OBJECTIVES

---

After studying this unit you will be able to:

- explain the purpose of preparing final accounts
- prepare a trial balance from a given list of balances
- prepare trading and profit and loss account
- prepare balance sheet
- prepare manufacturing account and calculate cost of goods produced
- present the final accounts in vertical form.

---

## 7.1 INTRODUCTION

---

In Unit 6 you have learnt about the concepts which guide the preparation of final accounts. You know that the final accounts are primarily prepared for ascertaining the operational result and the financial position of the business. They consist of (i) Profit and Loss Account, and (ii) Balance Sheet. The Profit and Loss Account reveals the profit earned or loss incurred (operational result) during the accounting year and the Balance Sheet indicates the financial position as at the end of the year. In this unit you will learn about the basic framework of final accounts including their presentation in vertical form.

---

## 7.2 FINAL ACCOUNTS AND TRIAL BALANCE

---

You know final accounts are prepared with the help of a Trial Balance which shows all the ledger balances as at the end of an accounting period. Generally, when you are asked to prepare final accounts you are given a properly prepared Trial Balance and you have no difficulty in identifying the items of incomes, expenses, assets, and liabilities. But, sometimes you may not be given a proper Trial Balance. You may simply be asked to prepare the final accounts from the list of closing balances extracted from the books of some firm. In such a situation, it will be helpful if you first prepare the Trial Balance and then the final accounts. Hence it is important that you should know how to prepare the Trial Balance from a given list of balances.

Normally when a Trial Balance is to be prepared, you have full details of ledger accounts with you. You can easily ascertain whether a particular account has a debit

balance or a credit balance, and prepare the Trial Balance without any difficulty. The problem arises when you are given a list of balances but it is not indicated whether the account has a debit balance or a credit balance. Under such a situation you will have to determine the nature of each balance before you can prepare the Trial Balance. In this exercise your knowledge of rules of debit and credit will help you. For example you know that in case of nominal accounts all expenses and losses are debited and all incomes and gains are credited. Similarly, you know the rules for real and personal accounts according to which the account of assets like cash, machinery debtors, etc. will show debit balances while accounts like capital, creditors, etc. will show credit balances. For convenience however, a few guidelines should help you. They are

- a) All accounts of expenses (including purchases) and losses will be debit balances.
- b) All accounts of income (including sales) and gains will be credit balances.
- c) All accounts of assets will be debit balances.
- d) All accounts of liabilities will be credit balances.
- e) Capital Account will normally be a credit balance.
- f) Drawings Account will be a debit balance.

However, the problem may arise with regard to some item like rent, discount, commission and interest as they can be expenses as well as incomes. In such cases, the nature of the balance is usually indicated by mentioning (Dr.) or (Cr.) against each item, or the word 'received' or 'paid' is written after each item. This helps you to treat the item correctly. But, if there is only one item for which no such indication is given you can proceed with the preparation of Trial Balance and work out the totals of both the columns. You will find that the total of one column will be less than the other. This means that the unidentified balance pertains to the column which is short. For example, here is an item of commission of Rs. 300 appearing in the list of balances and it is not indicated whether it is paid or received. When you prepare the Trial Balance you will find that the debit total is short by Rs. 300. This would mean that the Commission Account has a debit balance. Now if you show it as such in the Trial Balance, it will tally.

Look at Illustration 1 and see how the Trial Balance has been prepared from a given list of balances where the nature of each balance has not been indicated.

Illustration 1

Prepare a Trial Balance from the following balances extracted from the books of Sudhakar as on March 31, 1987.

|                   | Rs.      |                         | Rs.      |
|-------------------|----------|-------------------------|----------|
| Opening Stock     | 40,000   | Drawings                | 10,000   |
| Purchases         | 4,10,000 | Wages                   | 7,300    |
| Sales             | 4,29,000 | Salaries                | 11,000   |
| Purchases Returns | 1,250    | Outstanding Expenses    | 1,000    |
| Sales Returns     | 2,500    | Prepaid Expenses        | 750      |
| Carriage Inwards  | 1,500    | Postage                 | 900      |
| Carriage Outwards | 2,500    | Discount Received       | 375      |
| Bank Overdraft    | 21,000   | Discount Allowed        | 1,000    |
| Cash              | 4,000    | Bad Debts               | 750      |
| Capital           | 1,27,750 | Sundry Debtors          | 1,00,000 |
| Sundry Creditors  | 37,500   | Interest                | 3,500    |
| Loans             | 41,375   | Interest Received       | 300      |
| Investments       | 10,000   | Provision for Bad Debts | 1,750    |
| Accrued Income    | 600      | Furniture & Fixture     | 7,500    |
| Machinery         | 47,500   |                         |          |

**Solution:****Trial Balance of Sudhakar as on March 31, 1987**

| Particulars             | Dr.<br>Balances | Cr.<br>Balances |
|-------------------------|-----------------|-----------------|
|                         | Rs.             | Rs.             |
| Opening Stock           | 40,000          |                 |
| Purchases               | 4,10,000        |                 |
| Sales                   |                 | 4,29,000        |
| Purchases Returns       |                 | 1,250           |
| Sales Returns           | 2,500           |                 |
| Carriage Inwards        | 1,500           |                 |
| Carriage Outwards       | 2,500           |                 |
| Bank Overdraft          |                 | 21,000          |
| Cash                    | 4,000           |                 |
| Capital                 |                 | 1,27,750        |
| Sundry Creditors        |                 | 37,500          |
| Loans                   |                 | 41,375          |
| Investments             | 10,000          |                 |
| Accrued Income          | 600             |                 |
| Machinery               | 47,500          |                 |
| Drawings                | 10,000          |                 |
| Wages                   | 7,300           |                 |
| Salaries                | 11,000          |                 |
| Outstanding Expenses    |                 | 1,000           |
| Prepaid Expenses        | 750             |                 |
| Postage                 | 900             |                 |
| Discount Received       |                 | 375             |
| Discount Allowed        | 1,000           |                 |
| Bad Debts               | 750             |                 |
| Sundry Debtors          | 1,00,000        |                 |
| Interest                | 3,500           |                 |
| Interest Received       |                 | 300             |
| Provision for Bad Debts |                 | 1,750           |
| Furniture & Fixture     | 7,500           |                 |
| <b>Total</b>            | <b>6,61,300</b> | <b>6,61,300</b> |

In Illustration 1 the Trial Balance has tallied i.e., the total of debit balances column is equal to the total of credit balances column. This would mean that each balance has been entered in the appropriate amount column of the Trial Balance. **This** is not always true. It is quite possible that even when the Trial Balance has tallied, some balances may not have been entered in the correct columns. Look at Illustration 2. You will find that the Trial Balance has tallied (the totals of both Dr. balances and Cr. balances is the same i.e., Rs. 91,650) but there are a number of items which have been shown in the wrong columns. For example, bank overdraft which should have been shown in the Cr. balances column has been included in the Dr. balances column and Furniture which should have appeared in Dr. balances column has been shown in the Cr. balances column. So, the Trial Balance has been rewritten and all items shown correctly. Such situation arises on account of the compensating effect of the errors which is very rare.

**Illustration 2**

An inexperienced accountant provides you **with** the following Trial Balance. In case you find it to be incorrect prepare it again so as to remove its defects.

## Trial Balance as on June 30, 1987

| Name of Account         | L.F. | Dr.<br>Balances | Cr.<br>Balances |
|-------------------------|------|-----------------|-----------------|
|                         |      | Rs.             | Rs.             |

### 7.3 TRADING AND PROFIT AND LOSS ACCOUNT

You know **the** Profit and Loss Account is prepared for ascertaining the profit or loss of the business. This is worked out in **two** stages. **In** the first stage we work out the gross profit **or** gross loss and in the second stage, the net profit or net loss. Hence, the profit and **Loss Account** is divided into two sections, The first section is called Trading **Account**. It reveals the gross profit or gross loss. The second section is called Profit and Loss Account which shows the net profit or net loss.

#### 7.3.1 Trading Account

As stated above, the Trading Account is prepared for ascertaining the gross profit or gross loss. The gross profit is defined as the excess of sales revenue over cost of goods sold, This can be presented in the form of an **equation** as follows.

Gross Profit = Net Sales – Cost of Goods sold

Where i) Net Sales = Total sales – Sales Returns

ii) Cost of Goods Sold = Opening stock + Net Purchases  
+ Direct Expenses – Closing stock

You know the terms 'Opening Stock' and 'Closing **Stock**' refer to the value of unsold goods as at the beginning of the year and at the end of the year respectively. Such stock may also include the semi-finished goods and raw materials. In order to arrive at the cost of goods sold the opening stock is added to the net purchases while the closing stock is deducted. The term 'Direct Expenses' refer to those expenses which are incurred on the goods purchased till they are brought to the place of business for sale. These include expenses such as freight, insurance, import duty, dock dues, clearing charges, octroi duty, carriage, cartage, etc. The administrative expenses, selling and distribution expenses, interest paid, etc. are termed as indirect expenses and, therefore, are excluded from the cost of goods sold.

Look at Illustrations 3 and 4 and study how Cost of Goods Sold and the Gross Profit are-computed.

**Illustration 3**

The following figures have been extracted from the books of a firm. Calculate the Cost of Goods Sold.

|                      | Rs.       |
|----------------------|-----------|
| Stock as on 1.1.1987 | 1,00,000  |
| Purchases for 1987   | 15,00,000 |
| Purchases Returns    | 40,000    |
| Carriage Inwards     | 20,000    |
| Octroi               | 80,000    |
| Freight              | 15,000    |
| Stock as on 31.12.87 | 1,70,000  |

Solution:

|                               |                  |
|-------------------------------|------------------|
| Opening Stock                 | 1,00,000         |
| Add Net Purchases             |                  |
| (Purchases Rs. 15,00,000      |                  |
| Purchases Returns Rs. 40,000) | 14,60,000        |
| Carriage Inwards              | 20,000           |
| Octroi                        | 80,000           |
| Freight                       | 15,000           |
|                               | <u>16,75,000</u> |
| Less Closing Stock            | 1,70,000         |
| Cost of Goods Sold            | <u>15 05,000</u> |

**Illustration 4**

On January 1, 1987 a firm had stock of goods valued at Rs. 20,000. During the year the following transactions took place.

|                   | Rs.      |
|-------------------|----------|
| Sales             | 5,00,000 |
| Purchases         | 3,00,000 |
| Carriage Inwards  | 3,000    |
| Freight Inwards   | 5,000    |
| Sales Returns     | 10,000   |
| Clearing charges  | 22,000   |
| Purchases Returns | 5,000    |

The closing stock of goods on December 31, 1987 is Rs. 40,000.

Solution:

|                          | Rs.             | Rs.             |
|--------------------------|-----------------|-----------------|
| Sales                    | 5,00,000        |                 |
| Less Sales Returns       | 10,000          |                 |
| Net Sales                | <u>4,90,000</u> |                 |
| Less Cost of Goods Sold: |                 |                 |
| Opening Stock            | 20,000          |                 |
| Add Purchases            | 3,00,000        |                 |
|                          | <u>3,20,000</u> |                 |
| Less Purchases Returns   | 5,000           |                 |
|                          | <u>3,15,000</u> |                 |
| Add Carriage Inwards     | 3,000           |                 |
| Freight Inwards          | 5,000           |                 |
| Clearing Charges         | 22,000          |                 |
|                          | <u>3,45,000</u> |                 |
| Less Closing Stock       | 40,000          | 3,05,000        |
| Gross Profit             |                 | <u>1,85,000</u> |

**Form of Trading Account:** The Equation for Gross Profit is also known as Trading Account Equation. This equation forms the basis of preparing the Trading Account. The Trading Account, like any other account in the ledger, has two sides—debit and credit. The opening stock, purchases (less returns) and all direct expenses are shown on the debit side of the Trading Account while sales (less returns) and the closing stock on the credit side. The gross profit appears as the last item on the debit side which, in fact is the excess of the total of credit side over the total of debit side. If however, the total of the debit side exceeds the total of the credit side, it will be treated as gross loss. This is shown as the last item on the debit side of the Trading Account. The gross profit/gross loss thus worked out is transferred to the Profit and Loss Account. Look at the Figure 7.1 for the form of Trading Account.

Figure 7.1

|                        |         |        |             |        |        |

Based on the data given in Illustration 4, the Trading Account will be prepared as follows.

Trading Account of .....  
for the year ending December 31, 1987

| Dr.                 |          |          | cr.              |          |          |
|---------------------|----------|----------|------------------|----------|----------|
| Particulars         |          | Amount   | Particulars      |          | Amount   |
|                     |          | Rs.      |                  |          | Rs.      |
| To Opening Stock    |          | 20,000   | By Sales         | 5,00,000 |          |
| To Purchases        | 3,00,000 |          | Less Returns     | 10,000   |          |
|                     |          |          |                  |          | 4,90,000 |
| Less Returns        | 5,000    |          |                  |          |          |
|                     |          | 2,95,000 | By Closing Stock |          | 40,000   |
| To Carriage Inwards |          | 3,000    |                  |          |          |
| To Freight          |          | 5,000    |                  |          |          |
| To Clearing Charges |          | 22,000   |                  |          |          |
| To Gross Profit     |          | 1,85,000 |                  |          |          |
| (transferred to     |          |          |                  |          |          |
| (P&L A/c)           |          |          |                  |          |          |
|                     |          | 5,30,000 |                  |          | 5,30,000 |

- 1 Purchases: This item refers to the goods purchased for resale and includes **both cash** and credit purchases. The purchases of assets which are meant for permanent use **in** business such as machinery furniture, etc., are not included in the purchases. The amount taken to Trading Account will be the net amount of purchases (after deducting purchase **returns/returns** outwards.) If the proprietor has taken away some goods from the business for his personal use, the same should also be deducted from the total purchases.
- 2 Sales: It includes both cash and credit sales of goods and refers to the net amount of sales (after deducting sales returns-returns inwards). Sales of old furniture, car, machinery, etc. are not included in the sales. Similarly, sales of old newspapers etc. are also excluded from **sales**. Such items are shown as miscellaneous income in the Profit and Loss Account.
- 3 Wages: Wages are usually treated as a direct expense and so shown in the Trading Account. The difficulty arises when wages are clubbed with salaries (an **indirect** expense) and the Trial Balance includes a single amount for 'Wages and Salaries'. In such a situation, the amount may be shown in the Trading Account. It is based on the assumption that the item includes the salaries of the supervisory staff in the factory itself. But, if the item in the Trial Balance reads 'Salaries and Wages' it will be taken to the Profit and Loss Account on the assumption that the **item** includes wages of the office staff only. It should be noted that wages paid in connection with the purchases of fixed assets or the construction of building should not be charged to Trading **Account**. They are to be included in the cost of the concerned fixed asset. There is another important aspect in relation to wages which must be **clarified**. If a **Manufacturing** Account is prepared the wages paid to the factory labour is debited to Manufacturing Account about which you **will learn** later in this unit.
- 4 Freight, Carriage **and** Cartage: When paid in connection with purchases of goods, they are shown in the Trading Account. Such freight and carriage are also termed as 'Freight Inwards' and 'Carriage Inwards' respectively. 'Freight Outwards' and 'Carriage Outwards' relate to sales and therefore taken to the debit of Profit and Loss Account,
- 5 Royalties: Royalties refer to the payments made **for** the use **of** copyright or a patent. **The** amount of royalty is generally based on the quantity produced. It is, therefore, treated as a **direct** expense and charged to Trading Account. But if it is calculated on the basis of quantity sold as in case of books, it is shown in the Profit and Loss Account. Royalties are also paid to the Government for extraction of minerals such as coal, diamond, gold, etc. These are charged to the Profit and Loss **Account** of the mining companies, You will learn about the accounting of such royalties later under a separate course.

7.3.2 Profit and Loss Account

After ascertaining the gross profit by preparing the Trading Account, the businessman proceeds to prepare the Profit and Loss Account in order to work out the net **profit/net** loss. You know the net profit is the excess of gross profit and **other** incomes over the indirect expenses and losses. So, while preparing the Profit and Loss Account we show gross profit and other incomes such as rent received, discount received, commission received, interest and **dividends** etc. on the credit side, and **all** indirect expenses and losses on the debit side. Indirect expenses include all administrative, selling and distribution expenses such as salaries, rent and taxes, postage and stationery, insurance, depreciation, interest paid, office lighting, advertising, packing carriage outwards, etc., while losses refer to items like loss by fire, loss by theft etc. The difference between the two sides of the Profit **and** Loss Account **represent** either the net profit or net loss. If the total **of** the credit side is higher than the total of the debit side, the difference is called **net** profit and if the debit side total exceeds the credit side total, the difference is called net loss. The net **profit/net** loss belongs to the

proprietor and it is ~~therefore~~ transferred to his Capital Account. Look at figure 7.2. It shows various expenses. losses, incomes, etc. which usually appear in the Profit and Loss Account.

Figure 7.2

| To <del>Loss</del> by Theft                                     |        |  |        |
| To Other Expenses and<br>Losses, if any                         |        |  |        |
| To Net Profit<br>(transferred to<br>Capital Account)            |        |  |        |

- Notes:
- 1 The heading for the Profit and ~~Loss~~ Account, as in the case of the Trading Account, indicates the name of the business or proprietor and the period for which it is being prepared.
  - 2 In addition to the items shown in the above form, there are certain items such as depreciation, bad ~~debts~~, provision for doubtful debts, interest on capital, interest on drawings, etc., which appear in the ~~Profit~~ and Loss Account as a result of the adjustment entries. We shall discuss them in Unit 8.

Some Important Points

- 1 Rent, Rates and Taxes: These are charges levied by the municipal bodies on the house property. It is a common item of indirect expenses debited to the Profit and Loss Account.
- 2 Insurance: Generally, assets are insured to cover the ~~risk~~ of loss, say, by ~~fire~~. Premium paid to the insurance company should be treated as a business expense. When assets such as factory building, factory machinery, etc. are insured, the insurance premium should be debited to Trading Account. If on the other hand, the premium is paid for insurance of assets in the office building, ~~office~~ furniture, etc., it should be charged to Profit and ~~Loss~~ Account.
- 3 Bad ~~Debts~~: Bad debts denote the amount which could-not be recovered from the debtors to whom the goods were sold on credit. It is a ~~loss~~ and so debited to the Profit and Loss Account. You will learn ~~more~~ about their treatment in Unit 8.
- 4 Depreciation: Depreciation means decrease in ~~the~~ value of fixed assets due to ~~normal~~ wear and tear. You know that every fixed ~~asset~~ such as machinery, ~~furniture~~, vehicle, etc. depreciates in value ~~on account~~ of its constant use. Such

reduction in their value is a **loss to** the business and **so** charged to the Profit and Loss Account. If, however, a Manufacturing Account is also prepared, depreciation on **machinery** and factory building is charged to the Manufacturing Account, while depreciation on office **building**, office **furniture**, office **equipment**, etc. is charged to the Profit and Loss Account.

5 **Trade Expenses:** This item represents various small **expenses** incurred in the business. They are also called **General Expenses**, **Sundry Expenses** or **miscellaneous Expenses**.

6 **Packing:** The cost of packing **materials** such as **polythene** bags, wrapping materials, etc. for delivery is a **distribution** expense and **hence** charged to **Profit and Loss** Account. Where packing is essential to make the products fit for **sale in the market** as in the case of cigarettes, biscuits, **medicines**, oil, etc. it is called 'packaging' and such expenditure is charged to the Trading Account.

7 **Samples:** Generally, samples of goods are distributed **free of charge** to increase sales. The cost of such samples should be treated as a selling **expense** and **so** debited to Profit and Loss Account.

8 **Income Tax:** It is the **tax** payable by a person on **his income**. In the case of a **sole trading** concern, the **tax** paid by the proprietor on the profits of the business is treated as a **personal** expense. Hence, it should be added to drawings or directly deducted from capital.

#### Illustration 5

Prepare Profit and Loss Account from the following balances extracted from the books of a business for the year 1987.

|                     | Rs.      |
|---------------------|----------|
| <b>Gross Profit</b> | 1,85,000 |
| Salaries            | 20,000   |
| Rent and Rates      | 5,000    |
| Stationery          | 1,000    |
| Postage             | 500      |
| Insurance           | 2,000    |
| Repairs             | 1,500    |
| Depreciation        | 5,000    |
| Advertisement       | 5,000    |
| Discount (Dr.)      | 500      |
| Commission of       |          |
| Salesmen            | 5,000    |
| Bad Debts           | 2,000    |
| Loss by Fire        | 2,000    |
| Interest on         |          |
| Investments         | 2,500    |
| Profit on sale of   |          |

| To Loss by fire           | 2,000    |                            |          |
| To Net Profit             |          |                            |          |
| (transferred to           |          |                            |          |
| Capital Account)          | 1,40,000 |                            |          |
|                           | 1,89,500 |                            | 1,89,500 |

In Practice the Trading Account and the Profit and Loss Account are combined and one account called 'Trading and Profit and Loss Account' is prepared. This account is divided into two parts. The first part shows the Gross Profit and the **second** part shows the Net Profit.

Look at Illustration 6 and **see** how combined Trading and Profit and Loss Account will be prepared.

## Illustration 6

From the following figures prepare Trading and Profit and Loss Account of Lakshmi & Co. for the year ended December 31, 1987.

|                              |          |
|------------------------------|----------|
|                              | Rs.      |
| Stock on January 1, 1987     | 40,000   |
| Purchases                    | 98,000   |
| Commission Received          | 650      |
| Rent, Rates and Taxes        | 8,600    |
| Salaries & Wages             | 12,000   |
| Sales                        | 1,62,100 |
| Returns Inwards              | 2,400    |
| Returns Outwards             | 3,000    |
| Sundry Expenses              | 2,500    |
| Bank Charges                 | 50       |
| Discount Received            | 750      |
| Carriage on Purchases        | 2,000    |
| Discount Allowed             | 530      |
| Carriage on Sales            | 1,700    |
| Lighting and Heating         | 2,200    |
| Postage                      | 300      |
| Income from Investments      | 500      |
| Commission Paid              | 1,000    |
| Interest paid on a bank loan | 550      |

The **stock** on December 31, 1987 was valued at Rs. **26,000**

Trading and Profit & Loss Account of Lakshmi & Co.  
for the year ended December 31, 1987

| Dr.                           |          | Cr.                        |          |
|-------------------------------|----------|----------------------------|----------|

| To Postage                    | 300      |                            |          |
| To Commission Paid            | 1,000    |                            |          |
| To Interest paid on bank loan | 550      |                            |          |
| To Lighting & Heating         | 2,200    |                            |          |
| To Net Profit                 | 21,170   |                            |          |
|                               | 50,600   |                            | 50,600   |

7.3.3 Closing Entries

You learnt in Unit 2 that all nominal accounts which represent items of expenses and incomes are closed at the end of the accounting year by transfer to either the Trading Account or the Profit and Loss Account. The journal entries passed for such transfer are called closing entries. You also know that accounts relating to expenses and losses always show debit balances while those representing incomes show credit balances. In order to close an account which shows a debit balance and is to be transferred to the Trading Account we credit the account concerned with an amount equal to its balance and debit the Trading Account. For example, the Carriage Inwards Account Shows a debit balance of Rs. 6,000. The closing entry for this will be as follows:

|                         |     |           |       |
|-------------------------|-----|-----------|-------|
| Trading A/c             | Dr. | Rs. 6,000 | Rs.   |
| To Carriage Inwards A/c |     |           | 6,000 |

Similarly, an account which shows a credit balance, will be closed by debiting it with an amount equal to the balance and crediting the Trading Account or Profit and Loss Account, as the case may be. The closing entries are passed in the Journal Proper and it is necessary to pass such entries for preparing the Trading and Profit and Loss Account. The entries required for the items which are to be transferred to the Trading Account are as follows:

|                               |     |
|-------------------------------|-----|
| 1 Trading Account             | Dr. |
| To Stock Account (opening)    |     |
| To Purchases Account          |     |
| To Sales Returns Account      |     |
| To Direct Expenses Accounts   |     |
| (to be credited individually) |     |
| 2 Sales Account               | Dr. |
| Purchases Returns Account     | Dr. |
| Stock Account (closing)       | Dr. |
| To Trading Account            |     |

3 Trading Account  
To Profit and Loss Account  
(For gross profit)

Dr.

Final Accounts I

Note: If there is gross loss, the closing entry will be just the reverse of the above.

When the closing entry is passed for gross profit or gross loss the Trading Account stands closed. The entries required for items to be transferred to the Profit and Loss Account are as follows:

1 Profit and Loss Account  
To Expenses/Losses Accounts  
(to be credited individually)

Dr.

2 Incomes/Gains Accounts  
(to be debited individually)  
To Profit and Loss Account

Dr.

3 Profit and Loss Account  
To Capital Account  
(for Net Profit)

Dr.

Note: If there is net loss, the closing entry will be just the reverse of the above.

Let us see how closing entries for the items given in Illustration 4 will be passed. These are as follows:

JOURNAL

| Date           | Particulars  | L.F. | Dr.<br>Amount               | Cr.<br>Amount  |
|----------------|--|------|-----------------------------|--|

### Check Your Progress B

1 Distinguish between **Direct** and Indirect **Expenses**.

.....

.....

.....

.....

2 What is the purpose of preparing a Trading Account?

.....

.....

.....

.....

.....

.....

.....

.....

.....

3 State whether the following statements are True or False.

- i) The gross profit is the difference of total sales and credit sales.....
- ii) Direct **expenses** are those expenses which are directly attributable to purchase of goods for resale.....
- iii) Stock is valued at **cost** or market price whichever is lower.....
- iv) The net profit is the excess of gross profit and other incomes over the indirect expenses and losses.....
- v) Income **tax** paid in case of a **proprietary** concern is charged to Profit and Loss Account.....
- vi) **Trade Expenses** are charged to Trading Account.....

4 Fill in the blanks:

- i) **Carriage Outwards** is an example of..... expenses.
- ii) **Cost of goods** sold is equal to opening stock plus.....less.....
- iii) Cost of samples distributed free of cost are treated as..... expenses.
- iv) All direct expenses are debited to..... Account:
- v) **Loss on Account** of theft is..... to Profit, and Loss Account.
- vi) **Wages and salaries** are charged to.....

5 Ascertain the **cost** of goods sold from the following data:

|                        |            |
|------------------------|------------|
| Direct <b>Expenses</b> | <b>Rs.</b> |
| Opening Stock          | 8,000      |
| Purchases              | 12,000     |
| Interest Paid          | 80,000     |
| Closing Stock          | 500        |
|                        | 10,000     |

After ascertaining the net profit or net loss by preparing the Trading and Profit and **Loss Account**, the final **step** in preparing final accounts is the preparation of Balance Sheet. The purpose of Balance Sheet is to ascertain the financial position of a business **i.e.**, to know what the business owes and what it owns on a certain date. Hence it shows all assets and liabilities of the business as at the end of the accounting year.

**You** know that final accounts are prepared from the Trial Balance. All items of expense and income appearing in Trial Balance are transferred to the Trading and Profitand **Loss Account**. The remaining items which represent the balances of personal and real accounts are shown in the Balance Sheet. The accounts showing debit balances represent assets and those showing credit balances represent liabilities.

Look at figure7.3 and note how various assets and liabilities appear in the Balance Sheet.

Figure 7.3  
Balance Sheet of .....  
as on .....

| Liabilities           | Amount | Assets            | Amount |
|-----------------------|--------|-------------------|--------|
| Current Liabilities   | Rs.    | Current Assets    | Rs.    |
| Bank Overdraft        | .....  | Cash in hand      | .....  |
| Bills Payable         | .....  | Bills Receivable  | .....  |
| Sundry Creditors      | .....  | Cash at bank      | .....  |
|                       |        | Sundry Debtors    | .....  |
|                       |        | Closing Stock     |        |
| Long-term Liabilities |        | Investments       | .....  |
| Loan                  | .....  | Fixed Assets      |        |
| Mortgages             | .....  | Vehicles          | .....  |
| Capital               |        | Furniture         | .....  |
| Balance               | .....  | Plant & Machinery | .....  |
| Add Net               |        | Land & Buildings  | .....  |
| Profit                | .....  | Goodwill          | .....  |
| Less                  |        |                   |        |
| Drawings              | .....  |                   |        |
|                       | .....  |                   | .....  |
|                       |        |                   |        |

You should know that the Balance Sheet is prepared to ascertain the financial position at a particular point of time and not for a period. Hence the heading of the Balance Sheet will always read 'Balance Sheet as on ..... ' (usually last date of the accounting year).

**The** total of assets should always be equal to the total of liabilities. You learnt about this equality in Unit 1. If however, **they** do not tally, it would mean that some errors have been committed while preparing the final accounts. You must recheck the treatment of all items including **the** arithmetical aspect, and make the corrections where necessary so that the Balance Sheet tallies. '

**Assets:** The **term** 'assets' denote the economic resources (property) of the business and includes all current and **fixed** assets. You know current assets are those assets which are Likely to be realised within a period of one year (or during the normal operating cycle) and includes cash, stock, debtors, bills receivable, **short-term** investments, etc. The fixed assets, on the other hand, are those assets which are acquired for use in the business over a long period. They may be tangible like **machinery and furniture, or intangible like** goodwill, patents, etc. The assets also include certain expenses and losses which have not been written off in full. Examples of such expenses are: **formation** expenses, expenses incurred on issue of shares and debentures, unwritten amount of expenditure on advertising, etc. These are shown as the last item under '**Assets**' in the Balance Sheet.

**Liabilities:** **The** term 'liabilities' denote all claims against the assets of the business whether those of the outsiders (creditors) or those of the owners of the business. The

outsider's claims may be sub-divided into (i) current liabilities, and (ii) long-term liabilities. These are shown separately in the Balance Sheet (see figure 7.3). The current liabilities are those obligation which are likely to be met within one year (or during the normal operating cycle). The long-term liabilities refer to item like loans which are not to be paid in the near future. The owner's claim is shown as capital after adjusting it with the amount of net profit and drawings during the year.

Look at Illustration 7 and see how Balance Sheet is prepared from given list of balances.

Illustration 7

From the following balances extracted from the books of Deepak Brothers, prepare Balance Sheet as on December 31, 1987.

|   |           |                  |          |
|---|-----------|------------------|----------|
|   | Rs.       |                  | Rs.      |
| Capital                                   | 12,00,000 | Bills Payable    | 40,000   |
| Net Profit for 1987                       | 6,00,000  | Debtors          | 2,50,000 |
| Land & Buildings                          | 7,00,000  | Bills Receivable | 50,000   |
|   |           | Loan             | 1,60,000 |
| Plant & Machinery<br>(after depreciation) | 4,00,000  | Cash in hand     | 60,000   |
|   |           | Bank Overdraft   | 20,000   |
| Furniture<br>(after depreciation)         | 50,000    | Loose Tools      | 50,000   |
| Investment                                | 3,50,000  | Goodwill         | 1,00,000 |
| Creditors                                 | 2,00,000  |                  |          |
| Trade Marks                               | 25,000    | Closing Stock    | 1,85,000 |

Solution:

Balance Sheet of Deepak Brothers as on December 31, 1987

| Liabilities           | Amount    | Assets            | Amount    |
|-----------------------|-----------|-------------------|-----------|
| Current Liabilities   | Rs.       | Current Assets:   | Rs.       |
| Bank Overdraft        | 20,000    | Cash in hand      | 60,000    |
| Bills Payable         | 40,000    | Bills Receivable  | 50,000    |
| Sundry Creditors      | 2,00,000  | Sundry Debtors    | 2,50,000  |
|                       |           | Stock in hand     | 1,85,000  |
| Long-Term Liabilities |           | Investments       | 3,50,000  |
| Loan                  | 1,60,000  |                   |           |
| Capital:              |           | Fixed Assets      |           |
| Balance as on         |           | Loose Tools       | 50,000    |
| Jan. 1, 1987          | 12,00,000 | Furniture         | 50,000    |
| Add Net Profit        | 6,043,000 | Plant & Machinery | 4,00,000  |
|                       | 18,00,000 | Land & Buildings  | 7,00,000  |
|                       |           | Trade Marks       | 25,000    |
|                       |           | Goodwill          | 1,00,000  |
|                       | 22,20,000 |                   | 22,20,000 |

Now Look at Illustration 8. It shows how the Trading and Profit and Loss Account and the Balance Sheet are prepared from a given Trial Balance.

Illustration 8

From the following Trial Balance of Gupta & Sons, prepare Trading and Profit and Loss Account for the year ended December 31, 1987 and a Balance Sheet as on that date.

| Particulars                | Dr.<br>Balances | Cr.<br>Balances |
|----------------------------|-----------------|-----------------|
|                            | Rs.             | Rs.             |
| Capital                    |                 | 5,00,000        |
| Sales                      |                 | 10,00,000       |
| Sales Returns              | 25,000          |                 |

Note: In the above Balance Sheet all assets and liabilities have been shown in the order of permanence.

7.5 VERTICAL PRESENTATION OF FINAL ACCOUNTS

The Trading and Profit and Loss Account and the Balance Sheet have so far been presented as a two-sided statement. But, in practice, it is not necessary to present the final accounts in this form. Nowadays many firms present them in a simpler and more intelligible form which is called a 'narrative style' or 'vertical presentation'. According to this style the Trading and Profit and Loss Account as well as the Balance Sheet are shown in the form of vertical statements. This form of presentation is adopted by many companies for publication of their final accounts. It helps the users of financial statements to appreciate the significance of different items without any difficulty. They can easily interpret the data and judge the profitability and the financial position of the company.

Look at Figure 7.4 and study how various items are shown in the Trading and Profit and Loss Account and the Balance Sheet in vertical form.

.....

- 3 Complete the following **sentences** choosing one of the two alternatives given within brackets.
- i) Assets represent....,..... balances of personal and real accounts. (**debit/credit**)
  - ii) All liabilities which become due within one year are classified as.,,.....,.. liabilities. (**long-term/current**)
  - iii) Unwritten off amount of a deferred revenue expenditure is shown on the..... side of the Balance Sheet. (**asset/liabilities**)
  - iv) Totals of assets and liabilities are always.. ..,...., (different/equal)
  - v) Loose Tools are classified as..... assets. (**fixed/current**)
  - vi) **Mortgages** are classified as..... liabilities. (**current/long-term**)

## 7.6 MANUFACTURING ACCOUNT

In case of trading concerns you **can find** out the cost of goods and the gross profit by preparing a Trading Account. But a manufacturing concern has to first prepare another account called Manufacturing Account with the help of which it works out the cost of goods produced. The cost of goods produced is then transferred to the Trading Account for ascertaining the cost of goods sold and the gross profit.

A manufacturing concern purchases raw materials from the market and converts them into finished goods for sale. The cost of goods produced thus includes two major costs: (i) cost of raw materials consumed, and (ii) cost of conversion. These are explained below.

**Cost of Raw Materials Consumed:** This represents the cost of raw **materials** used in course of manufacture which can be worked out by adjusting the opening and closing stocks of raw materials in the purchases of raw materials. For **example**, a firm purchased raw materials worth Rs. **6,50,000** during 1967, and its stock of raw materials on January 1, 1987 (opening stock) was **Rs. 70,000** and on December 31, 1987 (closing stock) Rs, 90,000. The cost of raw materials consumed **during** 1987 will be worked out as follows:

|                                       |               |
|---------------------------------------|---------------|
| Opening Stock of Raw Materials        | Rs.<br>70,000 |
| Add Purchases of Raw <b>Materials</b> | 6,50,000      |
|                                       | <hr/>         |
|                                       | 7,20,000      |
| Less Closing Stock of Raw Materials   | 90,000        |
|                                       | <hr/>         |
| Cost of <b>Raw</b> Materials Consumed | 6,30,000      |
|                                       | <hr/>         |

The direct expenses incurred on the purchases of raw **materials** such as freight, import duty, dock dues, cartage, etc. can also be **included** in the cost of **raw materials** consumed. But the usual practice is to show them separately on the **debit side of the** Manufacturing Account.

**Cost of Conversion:** This includes all expenses **incurred** in the **factory** such as **wages** paid to labour, salaries of supervisory staff, factory rent and rates, **motive** power, **repairs** to plant and machinery, depreciation on plant and machinery, etc. All these **expenses** are debited to the Manufacturing Account.

Look at Figure 7.5 for the **proforma** of a Manufacturing Account.

**Figure 7.5**  
**Manufacturing Account of.....**  
**for the period ended.....**

| Dr.                                      |        |        | Cr.  |        |        |
|--|--------|--------|--|--------|--------|
| Particulars                              | Amount | Amount | Particulars  | Amount | Amount |
|  | Rs.    | Rs.    |  | Rs.    | Rs.    |
| To Work-in progress at the beginning     |        | ...    | By Sale 'of Scrap  |        | ...    |
| To Raw Materials Consumed:               |        |        | By Work-in-Progress at the end                             |        | ...    |
| Opening Stock of Raw Materials           | ...    |        | By Cost of Goods Produced (Transferred to Trading Account) |        | ...    |
| Add Purchases of Raw Materials           | ...    |        |  |        |        |
| Less Closing Stock of Raw Materials      | ...    | ....   |  |        |        |
| To Carriage Inwards                      |        | ...    |  |        |        |
| To Freight, Import Duty, Dock Dues, etc. |        | ...    |  |        |        |
| To Manufacturing Wages                   |        | ...    |  |        |        |
| To Motive Power                          |        | ...    |  |        |        |
| To Coal, Gas and Water                   |        | ...    |  |        |        |
| To Oil and Grease                        |        | ...    |  |        |        |
| To Factory Lighting & Heating            |        | ...    |  |        |        |
| To Factory Insurance                     |        | ...    |  |        |        |
| To Repairs to Factory Building           |        | ...    |  |        |        |
| To Repairs to Plant and Machinery        |        | ...    |  |        |        |
| To Depredation on Factory Buildings      |        | ...    |  |        |        |
| To Depreciation on Plant and Machinery   |        | ...    |  |        |        |
|  |        | ...    |  |        | ...    |
|  |        | ...    |  |        | ...    |

**Some Important Points**

**Scrap:** The term 'scrap' is used for waste materials coming out of the manufacturing process, Cuttings of cloth in readymade garments factory and metal cuttings in engineering factories are some examples of scrap. Any amount realised from the sale of scrap must be adjusted in the cost of goods produced. Hence, it is credited to the Manufacturing Account.

**Work-in-Progress:** It is quite likely that at the end of the year, there may be certain goods which are still in the process of manufacture. Such goods are called 'semi-finished goods' or 'work-in-progress'. There will always be some work-in-progress at the beginning as well as at the end of the accounting year. Their cost must be adjusted while working out the cost of goods produced. Hence the opening work-in-progress is shown on the debit side of the Manufacturing Account while the closing work-in-progress is shown on its credit side.

**Stock of Finished Goods:** Besides the stock of raw materials and semi-finished goods every firm will have the stock of finished goods. This is to be adjusted in the cost of goods sold and not in the cost of goods produced. Hence, it is not shown in the Manufacturing Account. As you learnt earlier, it will be shown in the Trading Account.

**Look at** Illustration 10 and see how Manufacturing Account is to be prepared.

Illustration 10

Prepare Manufacturing Account ~~from~~ the following particulars relating to the year 1987.

|                           |          |
|---------------------------|----------|
|                           | Rs.      |
| Purchases of Raw Material | 1,00,000 |
| Stock on 1.1.1987         |          |
| Raw Materials             | 10,000   |
| Work-in-Progress          | 5,000    |
| Finished goods            | 25,000   |
| Factory wages             | 15,000   |
| Factory Rent              | 5,000    |
| Fuel & Power              | 2,000    |
| Carriage Inwards          | 1,000    |
| Repairs of Plant          | 2,000    |
| Depreciation on Plant     | 5,000    |
| Sale of Scrap             | 500      |
| Stock on 31.12.1987       |          |
| Raw Materials             | 20,000   |
| Work-in-Progress          | 7,500    |
| Finished Goods            | 30,000   |

Solution:

Manufacturing Account for the year ended ~~December~~ 31,1987

| Dr.                                  |          | Cr.  |          |
|--------------------------------------|----------|--|----------|
| Particulars                          | Amount   | Particulars  | Amount   |
|                                      | Rs.      |  | Rs.      |
| To Work-in-Progress at the beginning | 5,000    | By Sale of Scrap   | 500      |
| To Raw Materials Consumed            |          | By Work-in-Progress at the end                             | 7,500    |
| Opening Stock                        | 10,000   | By Cost of Goods Produced (transferred to Trading Account) | 1,17,000 |
| Add Raw Material Purchased           | 1,00,000 |  |          |
|                                      | 1,10,000 |  |          |
| Less Closing Stock                   | 20,000   |  |          |
|                                      | 90,000   |  |          |
| To Factory Wages                     | 15,000   |  |          |
| To Factory Rent                      | 5,000    |  |          |
| To Fuel & Power                      | 2,000    |  |          |
| To Carriage Inwards                  | 1,000    |  |          |
| To Repairs of Plant                  | 2,000    |  |          |
| To Depreciation on Plant             | 5,000    |  |          |
|                                      | 1,25,000 |  | 1,25,000 |
|                                      |          |  |          |

You will observe that the stock of finished goods has not been shown in the Manufacturing Account. As stated earlier, it is to be taken to the Trading Account. Now, suppose the sales for the year 1987 were Rs. 1,60,000, the Trading Account will appear as follows:

| Dr.   |          | Cr.                                |          |
|---|----------|------------------------------------|----------|
| Particulars   | Amount   | Particulars                        | Amount   |
|   | Rs.      |                                    | Rs.      |
| To Opening stock of Finished Goods                    | 25,000   | By Sales                           | 1,60,000 |
| To Cost of Goods Produced (transferred from Mfg. A/c) | 1,17,000 | By Closing stock of Finished Goods | 30,000   |
| To Gross Profit (transferred to Profit & Loss A/c)    | 48,000   |                                    |          |
|   | 1,90,000 |                                    | 1,90,000 |

You have learnt that a **manufacturing** concern has to prepare Manufacturing Account before preparing the Trading and Profit and Loss Account. Though considered desirable but many firms do not do so because it is not compulsory. You will also generally be asked to prepare only the Trading Account without preparing the Manufacturing Account. In such a situation you will show all items of Manufacturing Account in the Trading Account itself. In other words, cost of raw materials consumed, expenses on purchases of raw materials, all manufacturing expenses, the opening and closing work-in-progress, sale of scrap, etc. will also be shown in the Trading Account. But, as per **common** practice, the items like depreciation and repairs to plant **and** machinery and factory building will be shown in the Profit and Loss Account and not in the Trading Account,

7.7 LET US SUM UP

At the end of the accounting year the businessman prepares the final accounts with the help of a Trial Balance. The final accounts consist of (i) Profit and Loss Account and (ii) **Balance** Sheet. The Profit and Loss Account is prepared for ascertaining the net **profit/net** loss of the business during the year and the Balance Sheet is prepared for ascertaining its financial position as at the end of the year.

The Profit and Loss Account is divided into two sections, The first section called Trading Account reveals the gross profit or gross loss and the second section called Profit and **Loss Account** shows the net profit or net loss. Gross profit is **defined as** the excess of sales revenue over the cost of goods sold which also includes the direct expenses. The net profit is worked out **by** crediting the Profit and Loss Account with the amount of gross profit and other incomes and debiting it with all indirect expenses and losses, In practice, we usually prepare a combined Trading and Profit and Loss Account. It is also necessary to pass closing entries for transferring all expenses and incomes to the Trading and Profit and Loss Account.

The **Balance** Sheet shows all assets and liabilities of the business. The assets represent the debit balances of the real and **personal** accounts plus the unwritten off amounts of deferred revenue expenses. The liabilities, on the other hand, represent the credit balances of real and personal accounts including capital, The total **assets** should always be equal to the total of liabilities.

The manufacturing concerns **may** also prepare a Manufacturing Account for ascertaining the cost of goods produced, which is then transferred to the Trading Account for ascertaining the cost of goods sold and the gross profit. This, however, is, not compulsory. Most manufacturing concerns prepare the Trading Account directly **by showing** all expenses incurred in the factory (including cost of raw materials Consumed) in the Trading Account itself.

## 7.8 KEY WORDS

Closing **Stock**: Goods remaining unsold at the end of the accounting year.

Cost of Conversion: Expenses incurred in the factory (for converting raw materials into finished goods.)

Cost of **Goods Sold**: Difference between the cost of goods available for sale and the cost of goods in stock.

Cost of Production: It is the cost of goods produced **which** includes cost of raw materials consumed and all manufacturing expenses.

Current Assets: Assets which are likely to be **realised within** a period of one year or during the **operating** cycle. They are also **called** floating assets.

Current Liabilities: **Liabilities which** are likely to be paid within one year or during the operating cycle. They are also called short-term liabilities.

Direct Expenses: Expenses incurred on the goods purchased till they are brought to the place of business.

Fictitious Assets: Expenses and losses not **yet** written off and shown as assets in the Balance Sheet.

Fixed Assets: Assets acquired for use in the business for a long period. They are also called non-current assets.

**Gross Profit**: **Excess of** sales revenue over the cost of goods sold'.

Indirect Expenses: All expenses other than direct **expenses**. These include expenses incurred in connection with general administration, financial matters and selling and distribution of goods.

Intangible Assets: Assets in the form of rights which cannot be seen or touched such as goodwill, patents, etc.

Net **Profit**: Excess of gross profit and other incomes over the **indirect** expenses and losses in the business.

**Non-Current** Liabilities: Liabilities payable **after** a long time. **They** are also called long-term liabilities.

Owner's Capital: Claim of owners against the assets of the business. It is also called owner's equity and is equal to excess of assets over outside liabilities.

Opening **Stock**: Stock of **goods** as at the beginning of the accounting year,

Scrap: Waste material which arises in the course of manufacture.

Tangible **Assets**: Assets which have physical form and can be seen and touched such as buildings, machinery, **etc.**

Work-in-Progress. Goods in respect of which some work still **remains** to be done. They are also called semi-finished goods.

 B 3 i)False ii)True iii)True iv)True v)False vi)False.  
 4 i)indirect ii)purchases, closing stock iii)selling iv)Trading v)debited vi)Trading Account  
 5 Rs. 90,000  
 C i)debit ii)current iii)asset iv)equal v)fixed vi)long-term

## 7.11 TERMINAL QUESTIONS/EXERCISES

### Questions

- Distinguish between:
  - Cost of Goods Sold and Cost of Goods Processed
  - Gross Profit and Net Profit
  - Direct Expenses and Indirect Expenses
  - Trading Account and Manufacturing Account
  - Profit and Loss Account and Balance Sheet
- Give dosing **entries** for Trading and Profit and Loss Account.
- What is a Balance Sheet? Describe different methods of arranging assets and liabilities.

### Exercises

- Find out the Cost of Goods Sold from the following figures extracted from the books of Allied Ltd. for the year 1987:

|                          | Rs.           |
|--------------------------|---------------|
| Stock (1.1.1987)         | 50,000        |
| Purchases                | 10,00,000     |
| Sales                    | 15,00,000     |
| Purchases Returns        | 50,000        |
| <b>Stock (31-1-1987)</b> | <b>70,000</b> |
| Direct Expenses          | 60,000        |
| Indirect Expenses        | 1,00,000      |

(Answer: Rs. 9,90,000)

- Find out the Cost of Goods Sold and Gross Profit from the following figures:

|                            | Rs.              |
|----------------------------|------------------|
| Inventory in the beginning | 60,000           |
| Purchases Less Returns     | 6,00,000         |
| Carriage Inwards           | 20,000           |
| Cartage Outwards           | 30,000           |
| Cartage and Freight        | 10,000           |
| <b>Wages</b>               | <b>50,000</b>    |
| <b>Sales Less Returns</b>  | <b>12,00,000</b> |
| Inventory at the end       | 40,000           |

(Answer: Cost of Goods Sold Rs. 7,00,000; Gross Profit Rs. 5,00,000.)

- From the data given in question No. 2 prepare **Trading** Account
- From the following balances of Shyam Sunder, prepare Profit and Loss Account for the year ended March 31, 1987.

|  | Rs.    | Final Accounts I |
|--|--------|------------------|
| OfficeExpenses                               | 5,280  |                  |
| Advertising                                  | 3,000  |                  |
| Legal Charges                                | 5,000  |                  |
| Postage and Telephone Charges                | 6,400  |                  |
| Salaries and Wages                           | 60,000 |                  |
| Travelling Expenses                          | 2,500  |                  |
| Interest Received                            | 600    |                  |
| Rent, Rates and Taxes                        | 20,800 |                  |
| Insurance                                    | 2,400  |                  |
| Office Lighting                              | 1,500  |                  |
| Stationery                                   | 1,200  |                  |
| Repairs                                      | 920    |                  |
| Miscellaneous Income                         | 800    |                  |
| Commission Paid                              | 4,000  |                  |
| Bank Charges                                 | 200    |                  |
| The Gross Profit for the year was Rs. 73,000 |        |                  |

(Answer: Net Loss Rs. 38,000)

5 The following balances have been extracted from the books of Plaza Electricals Ltd. for the year 1987.

|                   | Rs.      |
|-------------------|----------|
| Sales             | 5,00,000 |
| Purchases         | 3,00,000 |
| Return Inwards    | 10,001)  |
| Return Outwards   | 15,000   |
| Opening Stock     | 30,000   |
| Wages             | 20,000   |
| Carriage Inwards  | 5,000    |
| Carriage Outwards | 3,000    |
| Salaries          | 25,000   |
| General Expenses  | 10,000   |
| Rent and Rates    | 4,000    |
| Advertisement     | 5,000    |
| Bad debts         | 3,000    |
| Insurance         | 3,000    |
| Trade Expenses    | 2,000    |
| Depreciation      | 5,000    |

It was further given that the value of stock on December 31,1987 was Rs. 50,000. You are required to prepare Trading and Profit and Loss Account of Plaza Electrical Etd. for the year ending December 31,1987.

(Answer: Gross Profit Rs. 2,00,000; Net Profit Rs. 1,40,000)

6 From the following data pertaining to the transactions of Mehts Bros. for the year 1987, prepare Trading and Profit and Loss Account for the year ending December 31,1997.

|                       | Rs.       |
|-----------------------|-----------|
| Sales                 | 10,00,000 |
| Purchases             | 6,00,000  |
| Sales Returns         | 20,000    |
| Purchases Returns     | 10,000    |
| Inventory (beginning) | 40,000    |
| Wages                 | 50,000    |
| Carriage Inwards      | 20,000    |
| Carriage Outwards     | 15,000    |
| Trade Expenses        | 10,000    |
| Cartage and Freight   | 5,000     |
| Salaries              | 30,000    |

|                            | Rs.    |
|----------------------------|--------|
| General Expenses           | 10,000 |
| Insurance                  | 6,000  |
| Rent & Rates               | 5,000  |

|                       | Rs.             | Rs.             | Final Accounts |
|-----------------------|-----------------|-----------------|----------------|
| Postage and telephone | 900             |                 |                |
| Insurance             | 250             |                 |                |
| Sundry Expenses       | 800             |                 |                |
| Trade Debtors         | 20,000          |                 |                |
| Trade Creditors       |                 | 27,150          |                |
| Cash in hand          | 700             |                 |                |
| Cash at Bank          | 4,100           |                 |                |
| Carriage Outwards     | 1,700           |                 |                |
|                       | <u>1,59,250</u> | <u>1,59,250</u> |                |

The Stock on September 30, 1987 was valued at Rs. 9,250.

(Answer: Gross Profit Rs. 27,100; Net Profit Rs. 11,900; Balance Sheet Total Rs. 71,550)

9 The following figures have been extracted from the books of a manufacturer.

|                            | Rs.      |
|----------------------------|----------|
| Stock 1.1.1987             |          |
| Raw Materials              | 25,000   |
| Work-in-Progress           | 10,000   |
| Finished Goods             | 50,000   |
| Purchases of Raw Materials | 3,00,000 |
| Factory Wages              | 40,000   |
| Factory Rent               | 5,000    |
| Fuel & Power               | 5,000    |
| Carriage Inwards           | 2,500    |
| Repairs of Plant           | 20,000   |
| Depredation on Plant       | 25,000   |
| Sale of Scrap              | 2,000    |
| Stock on 31.12.1987        |          |
| Raw Materials              | 40,000   |
| Work-in-Progress           | 15,000   |
| Finished Goods             | 60,000   |

You are required to prepare a Manufacturing Account and ascertain the Cost of Goods Produced.

(Answer: Cost of Goods Produced: Rs. 3,75,500)

10 From the following Trial Balance prepare Manufacturing Account and the Trading and Profit and Loss Account for the year ended March 31, 1988, and Balance Sheet as at the end of the year.

| Particulars                           | Dr.<br>Balances | Cr.<br>Balances |
|---------------------------------------|-----------------|-----------------|
|                                       | Rs.             | Rs.             |
| Opening Stock of Raw Materials        | 60,000          |                 |
| Opening Stock of Finished Goods       | 32,000          |                 |
| Opening Stock of the Work-in-Progress | 10,000          |                 |
| Capital                               |                 | 1,44,000        |
| Purchase of Raw Materials             | 5,00,000        |                 |
| Sales                                 |                 | 8,00,000        |
| Purchase of Finished Goods            | 16,000          |                 |
| Carriage Inwards                      | 8,000           |                 |
| Wages                                 | 1,00,000        |                 |
| Salaries (75% Factory)                | 52,000          |                 |
| Commission                            | 6,000           |                 |
| Bad Debts                             | 4,000           |                 |

**Final Accounts**

|  | Rs.              | Rs.              |
|--|------------------|------------------|
| Insurance                                  | 8,000            |                  |
| Rent, Rates and Taxes<br>(50% Factory)     | 24,000           |                  |
| Postage and Telegram                       | 5,600            |                  |
| Miscellaneous Expenses                     | 3,200            |                  |
| Travelling and Conveyance<br>(50% Factory) | 7,000            |                  |
| Carriage Outwards                          | 5,200            |                  |
| Machinery                                  | 80,000           |                  |
| Furniture                                  | 10,000           |                  |
| Debtors                                    | 1,20,000         |                  |
| Creditors                                  |                  | 1,07,000         |
|  | <u>10,51,000</u> | <u>10,51,000</u> |

The Closing Stocks are as follows:

|                  |        |
|------------------|--------|
| Raw Materials    | 80,000 |
| Work-in-Progress | 24,000 |
| Finished Goods   | 16,000 |

(Answer: **Cost** of Production Rs. 6,26,750; Gross Profit Rs. 1,41,250; Net Profit Rs. 79,000; **Balance Sheet** Total Rs. 3,30,000).

Note: These questions will help you to understand the unit better. Try to write answer for them. But do not submit your answers to the University for assessment. These are for your practice only.

  - 8.3.16 Drawings of Goods by the Proprietor
- 8.4 Preparation of Final Accounts with Adjustments
- 8.5 Adjustments Given in Trial Balance
- 8.6 Let Us Sum Up
- 8.7 Key Words
- 8.8 Some Useful Books
- 8.9 Answers to Check Your Progress
- 8.10 Terminal Questions/Exercises

---

## 8.0 OBJECTIVES

---

- After studying this unit you should be able to:
- explain why adjustment entries are necessary at the time of preparing the final accounts
  - list the items in respect of which adjustments are usually made
  - pass the necessary adjustment entries
  - prepare final accounts with adjustments.

---

## 8.1 INTRODUCTION

---

In Unit 7 you learnt about the preparation of simple final accounts. They did not involve any adjustments. In practice, however, you are always required to make some adjustments while preparing the final accounts. It is because there may be many expenses and incomes relating to the current year which are still to be brought into the books of account. Then there may be certain items recorded in current year's books which actually relate to the previous year or the next year. Unless such items are duly adjusted in the books of account, the final accounts will not reveal the true and fair view of the state of affairs of the business. In this unit you will learn about all items which require adjustments and study how such adjustments are made in books of account and how they are incorporated in the final accounts.
